

UNIVERSITÀ
di **VERONA**

International Proteomics and Metabolomics Conference: MS-based omics in ageing and age-related diseases

NOVARA | 2-3 October 2023
Campus Perrone,
Università del Piemonte Orientale

PATRONAGES:

Contributions are invited (but not limited) to the following areas below:

- Understanding of aging with MS-based approaches
- Investigating aging and age-related diseases by MS (including autoimmune, neurodegenerative, cardiovascular diseases, cancer, and musculoskeletal disorders)
- MS in biomarker and drug discovery and precision medicine
- Quantitative and qualitative proteomics, metabolomics and lipidomics
- Single cell proteomics
- Untargeted mass spectrometry analysis
- Software and tools for data analysis
