DSM Speciale GIOVANI: lavori in corso

Posizioni aperte riguardanti la spettrometria di massa

ETH

Eidgenössische Technische Hochschule Zürich
Swiss Federal Institute of Technology Zurich

Postdoctoral Position at ETH Zurich, FT-ICR Mass Spectrometry

We seek to fill a postdoctoral position in our research group. The topic of the research project is the spectroscopic investigation of trapped fluorescent ions in the gas phase, and investigation of structural and functional aspects of trapped biomolecular ions. For this purpose, a new data system will be developed for an existing set-up that permits combined FTICR – optical spectroscopy experiments.

Prerequisites: Ph.D. degree in chemistry, physics or related area, strong background in analytical or physical chemistry and instrumentation, hands-on experience with FT-ICR mass spectrometry. Further information: see <http://www.zenobi.ethz.ch/research/>. Starting date: upon mutual agreement; the position is available immediately

Applications with CV, publication list, and 2 letters of recommendation should be sent directly to Prof. Renato Zenobi, by March 15, 2019.

A promotional graphic for the 7th MS J-Day event. It features a background image of a building with a water tower. Overlaid on this are several hexagonal shapes containing text and logos. The top right hexagon says "7th MS J-DAY", "I GIOVANI E LA SPETTROMETRIA DI MASSA", and "NOI Techpark Bolzano 27-05-2019". The bottom left hexagon contains the logo of the Società Chimica Italiana, "Divisione di Spettrometria di Massa", and "Gruppo Giovani". The bottom right hexagon contains the logo of the Versuchszentrum Laimburg, "Centro di Spettrometria", and "Research Centre". In the center, there is a mass spectrum graph showing relative intensity versus m/z with peaks labeled at 113, 151, 201, 214, 221, and 267.
